**GLORIA DEB LAMDEN-MCCOLLOUGH**

has successfully completed the online, non-credit Specialization

## Ethics in the Age of AI

As machine learning models begin making important decisions based on massive datasets, we need to be aware of their limitations. In this specialization, we will explore the rise of algorithms, fundamental issues of fairness and bias in machine learning, and basic concepts involved in security and privacy of machine learning projects. We'll finish with a study of 3 projects that will allow you to put your new skills into action.
